📍 Bhubaneswar, Odisha, India ✉ ashutoshmallik546@gmail.com 🌐 github.com/ashutoshmallik610

SUMMARY

MCA graduate with a strong foundation in Core Java, Object-Oriented Programming, JDBC, Collections Framework, and SQL. Experienced in developing Java console applications and applying software engineering principles through academic projects and internship experience. Seeking a Java Developer role where I can contribute to scalable software solutions while continuously enhancing my technical expertise.

EDUCATION

Gandhi Institute for Technological Advancement (GITA)	Bhubaneswar, Odisha
Brundaban +3 Science Residential College, Baramba	Cuttack, Odisha
81.80%	
Kanpur Anchalika H S School, Kanpur	Cuttack, Odisha
73.83%	
Gram Panchayat High School, Baselihata	Cuttack, Odisha
71%	

CERTIFICATIONS

Java Programming Certification Aug 2025	
- Successfully completed at Quality Coders	
• Gained hands on experience in core java Concepts and OOPs.	
HTML and CSS: Building a Single-page website <i>Coursera</i>	2025
-	
Introduction to Generative AI - Coursera	2024
-	

TECHNICAL SKILLS

Languages: Java, C#.NET Core, C, , HTML/CSS
Concepts: Object-Oriented Programming, Exception Handling, Collections framework, JDBC
Technologies & Tools: VS Code, IntelliJ IDEA, Eclipse
Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Technical Communication

INTERNSHIP

Cognifyz Technologies	Online
Java Specialist Intern	2024
- Developed and optimized Java-based applications leveraging core OOP principles including inheritance, polymorphism, encapsulation, and abstraction to build modular, maintainable codebases.	
- Developed small java programs for practical understanding.	

PROJECTS

Bank Management System

- Created Savings and Current Account modules.
- Implemented deposit, withdrawal, balance enquiry, and account validation.
- Used inheritance, abstraction, and custom exceptions.

Railway Reservation System

- Designed ticket booking and cancellation system.
- Implemented custom exceptions and seat validation.
- Applied OOP concepts and file/package organization.

Rapido Ride Booking System

- Developed a console-based ride booking application with user registration, login, and ride booking features.
- Implemented Bike, Auto, and Cab booking using inheritance and runtime polymorphism.
- Calculated ride fares dynamically based on vehicle type and distance and simulated captain search using multi-threading (Thread.sleep()).
